<td>No. 1 restricted research topic scholarships, funded by PNRR D.M. n. 118/2023</td>
<td>Inv.4.1PA - Quality of Life and people with Autism Spectrum Disorder: evaluation protocols in personal services</td>
<td>M-PED/03 - SPECIAL DIDATICS AND PEDAGOGY M-PED/04 – EDUCATIONA RESEARCH</td>
<td>The research project examines the main protocols for evaluating the Quality of Life (QoL) of young adults with Autism Spectrum Disorders who are placed in day centres. After analysing the scientific literature, the methodological specificities of the different triangulation tools useful for the implementation of Life Projects will be considered. In the light of the scientific evidence, a mapping of the most widely used protocols within the Italian social health services will be carried out, specifically related to the QoL of people with Autism Spectrum Disorders. Finally, an assessment protocol will be tested and validated through control and monitoring phases in order to activate Life Projects oriented to the QoL.</td>
<td>Study and research periods at Public Administrations, companies or research centres for at least six (6) months. Study and research periods abroad for at least six (6) months.</td>

| No. 1 restricted research topic scholarships, funded by PNRR D.M. n. 118/2023 | Inv.4.1PC - Enhancing the cultural, economic and social system of the Marche's inner areas for accessible tourism | L-ANT/07 - CLASSIC ARCHAEOLOGY L-ART/02 - HISTORY OF MODERN ART L-ART/04 - MUSEOLOGY AND ART AND RESTORATION CRITICISM AGR/01 - AGRICULTURAL ECONOMICS AND RURAL APPRAISAL M-PSI/01 - GENERAL PSYCHOLOGY SECS-P/08 - ECONOMY AND BUSINESS MANAGEMENT SPS/08 - SOCIOLOGY OF CULTURE AND COMMUNICATION | Brief description of the topics and objectives
The research project is aimed at creating the conditions to start a virtuous process to improve the accessibility of the Marche Region's historical villages and the historical, artistic and museum heritage they contain, based on awareness of and respect for the built fabric (material stratification of the historical fabrics, mutations introduced over time by restoration/restoration activities, including those related to catastrophic events, as well as those attributable to the changing relationships with activities and production areas), the works contained therein, the use of the most advanced information and heritage enhancement technologies, and the widening of the audience of potential beneficiaries.

Scholarship holders will develop a broad knowledge of the criticalities existing in the Marche Region’s historical village system with regard to the issue of accessibility, with a particular focus on the built heritage. They will identify good practices and experiences in order to draw up intervention guidelines specifically designed for the situation in the Marche region and such as to guarantee interventions that are respectful of contexts, effective and compatible with the requirements of protection and enhancement and capable of developing inclusive towards accessible tourism aimed in particular at fragile groups (the disabled, the elderly, children).

Obligations for scholarship holders
Study and research periods at Public Administrations, companies or research centres for at least six (6) months.
Study and research periods abroad for at least six (6) months.

Subjects on which the INTERVIEW hinges and possible bibliography
Presentation and critical discussion of research project; assessment of knowledge related to the research topic indicated; foreign language proficiency

INTERVIEW ASSESSMENT CRITERIA
1. Originality and logical development of project in relation to the research topic chosen by the candidate
2. Assessment of training and work profile even outside the university
3. Experience in Italy and abroad consonant with the candidate’s curriculum and the project he/she has presented
4. Proficiency test in the foreign language/s indicated and in the Italian language for foreign candidates

Specific requirements for the competitive exam
Master’s degree thesis discussed in one of the disciplinary fields consistent with the course’s educational objectives.

Obligations for enrollees
Attendance of doctoral training activities; as a rule, 6-month minimum experience abroad; participation in scientific activities and/or research projects promoted by one tutor and/or other members of the teaching committee.
